CALLUM BECKWITH

Telephone: *07403333115*

Email: *123callumb@gmail.com*

PERSONAL PROFILE:

I have a Bachelor of Science with First Class Honours in Computer Science and currently, work as a Senior Software Developer for Audit Partnership. Within this role, I build and maintain data-heavy software used to audit some of the largest companies in the UK and USA. I am responsible for multiple team members and provide them with the programming and company knowledge necessary to develop their skills. Prior to working in the finance sector, I ran a freelance design and development partnership, where I produced branding, marketing, and online software solutions for a wide range of clients.

I can programme in several languages and effectively utilise frameworks, as well as familiarise myself with most development stacks. I am accustomed to the agile development methodology, frequently lead sprints, and have responsibility for the distribution and reviewing of developers' work. I have been involved in the recruitment preparation for technical interview processes of prospective employees, as well as collaborating with the new members to support their integration into the team. I am also proficient with various development environments and have modest experience with design software.
